

Broadway Beer Wine & Spirits: 2026-27 Marketing Operations Playbook

A foundational operational document for Chris Reid, Marketing Manager | Prepared April 2026 | Operational window April 2026 through April 2027

Executive summary and how to read this document

This playbook consolidates an entire year of marketing into one operational system. It is built to serve two purposes at once: a weekly playbook the marketing manager runs from, and a scope-of-work document that makes the function legible to ownership. The core argument is that premium-positioned boutique retail in Kitsilano wins through **timing, taste authority, and neighbourhood voice**, not discounting. Everything below is organised so Chris can pick up Monday morning, see the week's anchors, and execute.

The approach rests on three load-bearing decisions. **First, the weekly cadence in the owner's original brief is too aggressive in volume and wrong in format mix**; evidence-based research shows a leaner, Reels-forward output of roughly nine pieces per week dramatically outperforms the proposed fourteen. **Second, Cowork (Anthropic's desktop agent, launched January 2026 and still in research preview) can automate roughly 60 to 70 percent of the weekly content factory**, but cannot and should not publish to Meta platforms directly. **Third, 2026 is a once-in-a-generation anchor year for Vancouver:** FIFA World Cup brings seven matches to BC Place between June 13 and July 7, [World Cup Wiki](#) and the entire calendar should be bent around that gravitational event.

The rest of this document gives the full 12-month calendar, platform cadence with data, content system architecture, templates, KPIs, and a 90-day phased rollout.

Part 1: The master 2026-27 marketing calendar

The calendar below integrates four layers of signal into a single timing framework: alcohol industry days, Vancouver cultural moments, Vancouver sports, and seasonal or weather triggers. Each month lists anchors in priority order, with the highest-priority moment bolded. Dates are verified against official sources as of April 18, 2026; where a date is not yet announced, it is flagged as estimated.

Calendar logic: tiers of priority

The year has three tiers of moments. **Tier 1 anchors** (roughly 10 per year) get a full multi-channel campaign: email, Reel, carousel, in-store display, and inventory preparation three to four weeks out. These are moments where Broadway Beer Wine & Spirits should be unignorable. **Tier 2 moments** (roughly 30 per year) get a single Reel or carousel plus a newsletter mention. **Tier 3 moments** (roughly 50 per year) get Stories-only coverage or a quick X cross-post. This tiering is what keeps output sustainable; treating every appreciation day as equal is how small shops burn out.

April 2026: transition month, heavy sports, BC Wine Month

Date	Event	Tier	Channel mix
All month	BC Wine Month	1	Anchor campaign: Okanagan producers in focus, weekly staff pick email, in-store BC VQA display
Apr 4	Whitecaps vs Portland (Cascadia Cup)	2	Reel: Pacific Northwest beer flight
Apr 11	Vaisakhi Parade Vancouver (Khalsa Diwan Society, 47th annual) City of Vancouver	3	Stories only: respectful acknowledgement, no alcohol push
Apr 15	Canucks final home game vs LA Kings	3	Stories: end-of-season
Apr 17	Malbec World Day	1	Anchor: Argentine Malbec feature, email, carousel of three picks by price tier
Apr 19	Vancouver Sun Run (50,000 runners, finish at BC Place) Run Guides Miss604	2	Reel: post-run patio wines, low-ABV "recovery" angle
Apr 25	Whitecaps vs Colorado	3	Cross-post only
Apr 30	Last day of BC Wine Month	1	Email closer with top-selling BC bottles of the month

Chris's focus this month: Malbec World Day carries double weight because it lands on the same date the store should be already running BC Wine Month. Split the content: early April

is BC, mid-April (April 15 to 17) pivots to Malbec, late April returns to BC with a spring-rosé teaser for May.

May 2026: spring transition, Mother's Day, wine appreciation wave

Date	Event	Tier	Channel mix
May 1	Sauvignon Blanc Day (first Friday) Wine Time Fridays	2	Reel + carousel: three Sauv Blancs for patio season
May 1-10	Spring Okanagan Wine Festival (Kelowna, BC Wine Awards May 1)	2	Email: which BC winners landed on our shelves
May 3	BMO Vancouver Marathon City of Vancouver Ahotu (finish line downtown)	3	Stories
May 5	Cinco de Mayo	2	Reel: agave spirits carousel, tequila vs mezcal primer
May 10	Mother's Day	1	Anchor: rosé and Champagne gift bundles, three days of lead-up email, Reel of gift-wrapping in store
May 13	World Cocktail Day	2	Carousel: three classics with spirit pairings from the shelf
May 16	World Whisky Day Drinkdays	2	Reel: staff pick whisky under \$60
May 18	Victoria Day (long weekend)	2	Email Friday before: BBQ reds and patio whites
May 21	Chardonnay Day Wine Time Fridays Wine & Spirit Education Trust	3	Cross-post from carousel library
May 25	National Wine Day Wine Time Fridays	3	Stories

June 2026: the pivot into World Cup, Greek Day, and summer launch

June is where the year's arc starts to bend. **FIFA World Cup Vancouver begins June 13**, and the store's entire physical presence and content calendar should already be tuned for it

by the first of the month. Fortunately, June also hosts Greek Day on the store's own five-block stretch of West Broadway (between Macdonald and Blenheim) Vancouver's Best Places on June 28. This is the single highest-leverage neighbourhood day of the entire year.

Date	Event	Tier	Channel mix
Jun 9	Bard on the Beach opens (Vanier Park, Kits, runs to Sep 19) Bard on the Beach +2	2	Reel: pre-show picnic wines, walking distance from the shop
Jun 11	FIFA Fan Festival opens at PNE (runs to Jul 19) Daily Hive	1	Email: "What Vancouver is about to become"
Jun 13	FIFA World Cup match 1: Australia vs UEFA Playoff C Winner (9 PM)	1	Anchor: Australian Shiraz feature, late-evening marketing
Jun 13	Rosé Day and World Gin Day (same day)	2	Stitched into FIFA messaging: rosé for early, gin for late
Jun 14	Italian Day on Commercial Drive (theme "Campione") Italianday +2	2	Reel: Italian wines, connection to FIFA
Jun 14	National Bourbon Day + Old Fashioned Day	3	Cross-post
Jun 18	FIFA: CANADA vs Qatar (3 PM)	1	Anchor day: BC VQA, Canadian whisky push, earliest-open-possible hours
Jun 19	National Martini Day	3	Stories
Jun 21	FIFA: New Zealand vs Egypt (6 PM), Father's Day	1	Anchor: Father's Day gift bundles, Marlborough Sauv Blanc feature
Jun 24	FIFA: CANADA vs Switzerland (noon)	1	Anchor: noon match means lunchtime walk-in spike, prep cold inventory
Jun 26	FIFA: New Zealand vs Belgium (8 PM)	1	Belgian beer deep cut, expand selection ahead
Jun 26	Vancouver International Jazz Festival		Email: jazz-pairing wines,

to Jul 5	Facebook	2	Hollywood Theatre is in Kits
Jun 27	BC Lions home opener (displaced to Kelowna) Wikipedia	3	Stories
Jun 28	Greek Day on Broadway Greek Day (52nd annual, Vancouver's Best Places store's own street, 11 AM to 9 PM) Vancouver Page Vancouver's Best Places	1	Anchor-plus: full shop activation, Greek wine and ouzo display, sidewalk tasting if licensing allows, staff day, pre-event email blast
Jun 30	Jazz Fest at Vancouver Playhouse (Keyon Harrold) Stir	3	Cross-post

Greek Day deserves a note. Roughly 100,000 people [AllEvents](#) walk past the store's door that Sunday. The preparation for it should start in early May: sourcing Greek wines (Assyrtiko, Xinomavro, Agiorgitiko), small ouzo selection, and a front-window display that reads both in Greek and English. This is not a content moment; it is an inventory-and-operations moment with content wrapped around it.

July 2026: World Cup peak, Khatsahlano, high summer

Date	Event	Tier	Channel mix
Jul 1	Canada Day	1	Anchor: all-Canadian shelf, email Canadian whisky carousel
Jul 2	FIFA Round of 32 at BC Place (8 PM)	1	Flexible content, depends on match
Jul 4	BC Lions at Kelowna vs Edmonton Wikipedia	3	Stories
Jul 7	FIFA Round of 16 at BC Place (1 PM)	1	Anchor: final Vancouver match, culmination email
Jul 11	Khatsahlano Street Party Curiosity (West 4th, 10 blocks, Vancouver Is Awesome 150,000 attendees, Vancouver Is Awesome "Wonderland" theme) Kitsilano +2	1	Anchor: Kitsilano's other great street day, wine garden partnership if possible, BC wine and craft beer feature, pre-event Reel

Jul 19	FIFA World Cup Final (MetLife Stadium, watch party opportunity)	1	Email: "how to throw the Final"
Jul 24	National Tequila Day	2	Reel: three tequilas for three drinkers
Jul 25	BC Lions return to BC Place vs Toronto OurSports Central	3	Stories
Jul 25 to Aug 2	Vancouver Pride Festival (parade Aug 2) Vancouver's Best Places	2	Email series: Pride-themed rosé and Champagne, authentic not performative
Late Jul	City of Vancouver one-night fireworks replacement for Celebration of Light Daily Hive (date TBA, expected early Aug)	2	Reel when confirmed

Honda Celebration of Light is cancelled for 2026. [Daily Hive](#) [Wikipedia](#) The City approved a single-night replacement fireworks event for early August, [Daily Hive](#) date still TBA as of this writing. Watch for announcement in May and adjust calendar accordingly.

August 2026: Pride, PNE Fair, back-to-patio wind-down

Date	Event	Tier	Channel mix
Aug 1	Whitecaps return to BC Place vs LAFC Vancouver Whitecaps FC whitecapsfc	2	Reel: California wines in contrast
Aug 2	Vancouver Pride Parade (ends at Davie Village Festival) Vancouver's Best Places Gay Travel 4u	1	Anchor: Pride window display and email, sponsor-level local angle
Aug 3	BC Day (long weekend)	1	Anchor: BC everything, email Friday before

Aug 6	IPA Day (first Thursday)	2	Reel: BC IPAs
Aug 7	International Beer Day (first Friday) Calendarr	2	Carousel: five BC breweries to try this month
Aug 8	BC Lions vs Hamilton OurSports Central	3	Stories
Aug 16	National Rum Day	2	Carousel
Aug 18	Pinot Noir Day	2	Reel: BC vs Oregon vs Burgundy mini-primer
Aug 22 to Sep 7	PNE Fair Miss604 (Summer Night Concerts in new Freedom Mobile Arch: Nelly, Zedd, Blue Rodeo, The Guess Who, Daily Hive Mt. Joy, Cynthia Erivo with VSO) Miss604	2	Reels around specific concerts, "before the PNE" pre-game angle
Aug 23	BC Lions vs Saskatchewan	3	Stories
Aug 30	Last Vancouver Canadians home game (Nat Bailey) Vancouver's Best Places	3	Stories

September 2026: harvest turn, Cabernet, Labour Day

Date	Event	Tier	Channel mix
Sep 3	International Cabernet Sauvignon Day (Thu before US Labor Day) Wine Time Fridays Checkiday	1	Anchor: Cab flight across price tiers, email, carousel
Sep 5	Whitecaps vs St. Louis, Labour Day weekend SeatGeek whitecapsfc	2	Reel: BBQ reds
Sep 7	Labour Day (Canadian)	2	Stories, last-gasp-of-summer email

			Friday
Sep 9	Whitecaps vs LA Galaxy SeatGeek whitecapsfc	3	Stories
Sep 13	Whitecaps vs Austin SeatGeek whitecapsfc	3	Cross-post
Sep 18	Grenache Day (third Friday) Wine Time Fridays	3	Stories
Sep 19 to Oct 4	Oktoberfest Munich (191st) Munich Oktoberfest	2	Email: German beer feature, carousel of three styles
Sep 21 to 27	Negroni Week Negroniweek	2	Reel: gin, Campari, vermouth shelf tour
Sep 25	BC Lions vs Saskatchewan	3	Stories
Sep 26	Whitecaps vs D.C. United SeatGeek whitecapsfc	3	Cross-post
Late Sep	VIFF opens (check announced dates) Wikipedia	2	Email: VIFF date-night bottles
Late Sep	Fall Okanagan Wine Festival (dates TBA)	2	Email when confirmed

October 2026: Thanksgiving, Champagne, Halloween, Canucks return

Date	Event	Tier	Channel mix
Early Oct	Canucks 2026-27 home opener (date TBA, expected early-mid October) Sports Games Today	1	Anchor: season-return email, Canucks pairing Reel when date confirmed
Oct 4	National Vodka Day	3	Stories
Oct 9	BC Lions vs Ottawa, OurSports Central Thanksgiving weekend	2	Cross-post
			Anchor: turkey wines email, Pinot

Oct 12	Thanksgiving (Canadian) Canada.ca	1	Noir and Beaujolais feature, order-ahead encouragement
Oct 23	Champagne Day (fourth Friday)	2	Reel: Champagne under \$60, grower-producer angle
Oct 23	BC Lions regular-season finale vs Winnipeg Sportshistori	3	Stories
Oct 28	Whitecaps vs San Diego whitecapsfc	3	Cross-post
Oct 31	Halloween	1	Anchor: limited-release spooky labels, natural wine feature, "orange wine for orange season" Reel

November 2026: Beaujolais, Grey Cup, wine holiday on-ramp

Date	Event	Tier	Channel mix
Nov 1	Whitecaps vs Seattle Sounders Vancouver Whitecaps FC whitecapsfc (biggest regular-season match)	1	Reel: Washington vs BC wine battle
Nov 5	International Stout Day (first Thursday)	2	Reel: five BC stouts
Nov 7	Merlot Day	2	Carousel
Nov 8 to 14	Grey Cup Festival (Calgary) Greycup2026	2	Email: Alberta whisky feature
Nov 11	Remembrance Day	3	Stories only: respectful, no promotion
Nov 12	Tempranillo Day (second Thursday)	2	Carousel: Spain primer
Nov 15	113th Grey Cup in Calgary Calgary Stampeders	2	Reel: BC Lions watch-party reds
Nov 18	Zinfandel Day	3	Stories
	Beaujolais Nouveau Day (third Thursday)		Anchor: traditional midnight release Vedettes du Pont Neuf

Nov 19	Thursday) The Good Life France	1	if feasible, in-store event, email, Reel of first-pour
Mid-Nov onward	Vancouver Christmas Market opens (Jack Poole Plaza, historically runs to Dec 24) ActiviFinder Vancouver Markets	2	Email: Glühwein ingredients at our shop
Mid-Nov	MLS Cup Playoffs begin (possible Whitecaps home games)	2	Flexible
Late Nov	Vancouver Warriors NLL 2026-27 season begins OurSports Central	3	Stories

December 2026: the commercial peak, holiday machine

December is the business's most commercially critical month. The entire content factory should pre-build December by mid-November. Nothing is improvised in December; it's all inventory with captions attached.

Date	Event	Tier	Channel mix
Dec 1	Holiday season official launch	1	Anchor email: "What we've pulled together for the season," full gift-guide landing page on Squarespace
Dec 1 to 20	Rolling gift-bundle campaigns	1	Twice-weekly Stories, weekly email, Reel every Friday
Dec 13 (Sun)	Hanukkah begins (Dec 13 to 21, 2026)	2	Respectful acknowledgement Reel or Stories, kosher wines if stocked
Dec 24	Christmas Eve	1	Last-minute gift bundle email Dec 22
Dec 25	Christmas Day (closed)	1	Pre-scheduled Stories
Dec 26	Boxing Day	2	Stories: open hours, no discount push
Dec 31	New Year's Eve	1	Anchor: Champagne and sparkling wine feature for two weeks prior, email cadence Dec 27, 29, 30, sparkling wine Reel series

January 2027: quiet recovery, Dine Out, Burns Night

Date	Event	Tier	Channel mix
Jan 1	New Year's Day	3	Stories
Mid-Jan	Dine Out Vancouver 2027 opens (dates TBA, typically late Jan to early Feb) Foodgressing +2	2	Email: wines to pair with Dine Out prix fixe
Jan 17	Whitecaps 2027 preseason ramp	3	N/A
Jan 25	Burns Night	1	Anchor: Scotch whisky evening, email, Reel of featured single malts, in-store pouring event if licensing allows
Jan 27	Port Wine Day Wineinternationalassociation The Sounds of Portuguese	2	Carousel: three ports across a dinner

February 2027: wine festival, Lunar New Year (late 2027), Scotch, cocktails

Date	Event	Tier	Channel mix
Feb 7	NHL All-Star Game (UBS Arena) Wikipedia	3	Stories
Feb 8	International Scotch Day	2	Reel: follow-up to Burns Night
Feb 14	Valentine's Day	1	Anchor: Champagne and date-night wines, email Feb 10, Reel Feb 12
Feb 16	Mardi Gras 2027	3	Stories
Feb 17, 2027	Lunar New Year 2027 (Year of the Goat)	2	Email: Chinese-cuisine pairings

Feb 22	National Margarita Day	2	Reel: three tequilas, three margarita builds
Feb to Mar (TBA)	Vancouver International Wine Festival 2027 (confirmed March 8-13, 2027 , featuring TBA)	1	Anchor: pre-event email, in-store tasting parallel program

March 2027: Wine Festival peak, St Patrick's, spring pivot

Date	Event	Tier	Channel mix
Mar 3	International Irish Whiskey Day	2	Reel
Mar 6-7	HSBC SVNS Rugby Sevens at BC Place Facebook	2	Reel: rugby-night whiskeys, costume culture angle
Mar 8-13	Vancouver International Wine Festival 2027	1	Full anchor campaign, in-store VIWF bottles section
Mar 13	Riesling Day	2	Carousel
Mar 17	St Patrick's Day	1	Anchor: Irish whiskey and stout feature
Mar 20	Spring begins, patio messaging pivots	2	Shift Reels tone
Mar 27	International Whiskey Day U.S. Whiskey Report	2	Carousel: whisky around the world
Mar 27 onward	Vancouver Cherry Blossom Festival 2027 opens	2	Reel

April 2027: year completes, BC Wine Month returns

BC Wine Month, Malbec World Day (Apr 17), Sun Run, Vaisakhi. Repeat cycle with lessons learned from April 2026.

Known placeholder gaps to fill as dates confirm

Canucks 2026-27 schedule (release expected June to July 2026), [Sports Games Today](#) MLS Cup Playoffs specifics (mid-November onward based on seeding), Fall Okanagan Wine Festival 2026, Vancouver Craft Beer Week 2026, Dine Out Vancouver 2027, and the 2026 one-night fireworks replacement date. Chris's monthly review (third Monday of each month)

should include checking these event pages and updating the calendar.

Part 2: Content cadence recommendation (evidence-based)

The owner's proposed cadence of daily Instagram, weekly Facebook, weekly X, weekly email, and bi-weekly video is **too aggressive in volume, wrong in format mix, and underinvested in the one channel that actually drives discovery for a sub-10K Instagram account: Reels**. The recommendation below follows from 2025-26 platform research.

Instagram: 4 to 5 feed posts per week, daily Stories

Buffer's analysis of two million posts across 100,000 accounts in 2025-26 shows that posting three to five times per week more than doubles follower growth versus one to two times, but **returns flatten sharply after five posts per week**. For a 1,607-follower account, daily posting does not more than double reach; it burns the manager out and drops quality. The Metricool and HypeAuditor Instagram Content Playbook 2025 found that for accounts under 1,000 followers, Reels earn median reach of 134 versus 23 for static images, a roughly sixfold advantage. Socialinsider 2026 benchmarks put Instagram's average engagement rate at 0.48 percent and falling, with carousels and Reels leading and static images decaying fastest.

The right mix is **two Reels per week, one or two carousels, zero to one static posts, and Stories roughly daily**. Stories carry low production cost and are the retention layer; Reels are the discovery engine; carousels are the save-and-share layer for depth content like staff picks and tasting notes. The owner's proposed bi-weekly video is the single biggest strategic miss in the original brief; it effectively opts out of Instagram growth in 2026.

Facebook: 2 to 3 cross-posts per week, plus Events and local Groups

Facebook's organic reach for small-business pages averages 1.37 percent, meaning a 1,100-follower page reaches roughly fifteen people per post organically. But **Facebook remains the number-one platform in Canada** with 67 to 78 percent weekly use among adults (EnviroNics 2025, MTM 2025), and its 35-plus demographic skews exactly toward the premium wine and spirits buyer. Keep Facebook, but produce **no bespoke content** for it. Cross-post adapted versions of the Instagram carousels and the email, create Facebook Events for every tasting and in-store pour, and have Chris actively engage (not post) in two or three Vancouver-area neighbourhood and foodie Groups. Pay to boost one or two posts per month around anchor events at \$20 to \$50 each; this is dramatically more efficient than grinding daily organic.

X/Twitter: stop posting natively

Toronto Metropolitan University's State of Social Media in Canada 2025 reports X account ownership in Canada at 37 percent, down from 42 percent in 2020, and **it is the only major platform still declining in Canada**. Environics finds only 17 percent of Canadians use X weekly. Institutional exodus is visible (Supreme Court of Canada left X in February 2025). For a boutique Vancouver liquor retailer with a premium-wine buyer audience, native X posting is a time sink with near-zero ROI. **Recommendation: auto-cross-post from Instagram via Buffer, and pin a message directing followers to Instagram and the newsletter.** Do not migrate effort to Bluesky or Threads yet; those have under six percent Canadian adoption. Revisit in twelve months.

Email: bi-weekly newsletter, monthly segmented send, automated flows

Klaviyo 2026 benchmarks for food and beverage show campaign open rates of 31.2 percent and click rates of 1.7 percent, with flows at 5.8 percent click. Sinch's 2024 research finds 69 percent of unsubscribes cite frequency as the reason. **Weekly email is defensible only if every send carries genuine value.** Most local liquor retailers can't sustain that quality bar weekly without fatigue. The safer build is a bi-weekly newsletter to the full 1,500 list (26 per year), a monthly deeper send to an engaged sub-segment (last-30-day openers or a wine-club segment), plus automated flows for welcome (3-email series), birthday, post-purchase, and 90-day winback. Klaviyo data shows flows generate up to 30 times more revenue per recipient than one-off campaigns. Expect 35 to 42 percent open rates for a local list; target 2 to 3 percent click.

Video, Reels, TikTok, and YouTube Shorts

TikTok is a skip for 2026. TikTok's 2024 policy update allows alcohol advertising in Canada but explicitly prohibits retail and delivery advertisements, which is exactly what this store would need. Organic content also has no age-gate enforcement on commenters, adding compliance risk. Revisit if policy changes.

Instagram Reels are the primary video investment, two per week. Production can stay low-lift: phone-shot, 15 to 60 seconds, trending audio. Studies from CreatorsJet 2025 show unpolished Reels outperform heavily produced ones. Instagram's October 2025 algorithm update elevates same-day publishing, so publishing time matters. **YouTube Shorts: repurpose the Reels, don't create native.** Upload the same vertical video; zero marginal work. 73 percent of Canadians use YouTube (Social Media Lab 2025), making even passive presence worthwhile.

Summary: the recommended weekly output

--	--	--	--

Channel	Owner proposed	Recommended	Change
Instagram feed	7 daily posts	4 to 5 (mix of 2 Reels, 1 to 2 carousels, 0 to 1 static)	Volume down, formats upgraded
Instagram Stories	Not specified	5 to 7 per week	Added
Facebook	1 per week	2 to 3 cross-posts plus Events and Groups	Volume up, zero new production
X/Twitter	1 per week	Zero native, auto cross-post only	Cut
Email	1 per week	Bi-weekly newsletter plus monthly segmented plus flows	Simplified, added flows
Video	Bi-weekly	2 Reels per week, repurpose to YouTube Shorts	Significantly up

Total production load: roughly 9 pieces per week, 8 to 10 hours. This is sustainable. The owner's proposed 14 pieces per week would take 12 to 15 hours and collapse in quality within 6 to 8 weeks.

BC alcohol advertising compliance note

BC's Liquor and Cannabis Regulation Branch advertising standards apply to all channels. Key constraints: no implying alcohol has therapeutic properties, no promoting price reductions in ways that encourage immoderate consumption, no targeting minors, no implied endorsement that links alcohol to personal success. Meta also age-gates content marked as alcohol-related. Chris should run an annual compliance review of templates and have every anchor-tier post reviewed against LCRB guidance before publishing.

Part 3: The content system architecture

The weekly content factory is a pipeline, not a daily improvisation. The architecture below describes the data flow, the role of Cowork, and the demarcation between automation and human work.

High-level data flow

INPUTS (sources of truth, updated on rhythm)

[1] Barnet POS export (Account 739, Shop 360; weekly CSV: product, SKU, inventory, 12mo sales, category)	[2] Annual calendar (this document, canonical version as markdown) Living file	[3] Brand voice file (tone, rules, BC compliance, do's and don'ts) Living file
---	--	--

COWORK WEEKLY RUN (Monday 7 AM, scheduled task)

Step 1: Read next 7 days from calendar, flag anchor tier
Step 2: Pull relevant SKUs from inventory.csv based on
anchor theme (e.g. Malbec Day → query Malbec)
Step 3: Cross-ref 12-month sales for each candidate SKU
(top sellers, long-tail gems, price tier balance)
Step 4: Web search for product context (producer news,
vintage notes, awards) per SKU
Step 5: Draft content per brand-voice.md:
- Instagram captions (template 1)
- Reel script + shot list (template 2)
- Carousel slide text (template 3)
- Email: subject + preview + body (template 4)
Step 6: Generate Canva designs via Canva connector
(carousel slides, email header, Stories stickers)
Step 7: Save all to /BroadwayBWS/WeeklyContent/2026-WWxx/
Step 8: Notify Chris via Slack or email: "Week xx ready"

HUMAN REVIEW (Chris, Monday 9 to 10:30 AM)

- Verify product facts against shelf reality
- BC LCRB compliance scan
- Tone check: does it sound like us
- Approve or edit in the same folder
- Assign photography needs to Tues/Wed shop visit

PHOTO/VIDEO (Chris + phone, Tuesday or Wednesday)

- Shoot Reels (2) to the script, shot list in hand

What Cowork is and is not (April 2026 reality)

Cowork is Anthropic's desktop agent, launched January 2026 and currently in research preview, available on all paid Claude plans (Pro, Max 5x, Max 20x, Team, Enterprise). It runs inside Claude Desktop for macOS and Windows. It is not a visual workflow builder like Zapier; configuration happens through natural-language instructions, Skills (markdown instruction files), Plugins (bundled skills plus connectors), and the `/schedule` command for recurring tasks.

Cowork can: read and write local files across all major formats, run applications, interact with browsers via the Claude for Chrome extension, read structured data (CSV, Excel, JSON), generate Word/PowerPoint/Excel with working formulas, create Canva designs via the official Canva connector, execute scheduled tasks (provided the computer is awake and the Desktop app is open), spin up parallel sub-agents, and integrate with Slack, Google Drive, Gmail, Notion, HubSpot, and others via official MCP connectors.

Cowork cannot: post directly to Instagram or Facebook (Meta API restrictions; browser automation workarounds are fragile and risk Meta ToS violations), send Mailchimp campaigns without a human pressing send (community Mailchimp MCP can draft, but the send is manual), generate raster images natively (use Canva connector or a Gemini Imagen MCP), or run headless when the laptop is asleep. It is also **not suitable for regulated data** (no audit logs, not HIPAA or FedRAMP compliant).

Security caveat: PromptArmor demonstrated prompt-injection exfiltration vulnerabilities in

2026 even against Opus 4.5. Do not point Cowork at folders containing customer PII, payment data, or liquor licence documents. Keep the content folder separate from operational back-office files.

Recommended plan: Max 5x at \$100/month

Pro (\$17 to \$20/month) hits rate limits quickly with weekly scheduled content runs; Max 5x is the sweet spot. Team (\$20/seat) adds Slack connector if Broadway ever scales marketing to more than one person.

The weekly folder structure

```
/BroadwayBWS/
├─ brand-voice.md           (tone, rules, compliance, locked templates)
├─ calendar-2026-27.md     (this document's Part 1)
├─ inventory/
│   ├─ current-week.csv    (Cowork reads; Chris refreshes weekly from Bar
│   └─ 12mo-sales.csv      (Cowork reads; monthly refresh)

│   └─ 2026-WW18/ ...
├─ KPIs/
└─ weekly-reports/        (Cowork's Friday output)
```

What stays human

Photography, final approval, BC LCRB compliance sign-off, Mailchimp send, Instagram and Facebook posting (via Later or Buffer, not Cowork), staff voice calibration, and relationship work (DM replies, comment threads, local Groups engagement). Roughly 40 percent of weekly time remains human; 60 percent is shifted to Cowork.

Publishing tools alongside Cowork

Use **Later or Buffer** for Instagram and Facebook scheduling; these have sanctioned Meta

Business API access. Keep **Mailchimp** for email (human presses send after review). Keep **Squarespace** as the interim landing page for campaigns; plan Bottlecapps e-commerce deeper integration as a Phase 3 project. X cross-post via Buffer's auto-post.

Part 4: Content templates (locked formats)

These templates are canon. Cowork pulls from them every week. Chris's job on review is to make sure the drafts stayed inside the frame, not to reinvent the frame each time.

Template 1: Instagram feed post (locked)

Title anchor, opening hook (local human moment), specific opinionated product recommendation, timely reason to act, closing sign-off, hashtags.

[Month] Feature (and what we're sipping):
[Producer/bottle name]

[1-2 sentence hook: local human moment in Kits, Vancouver, or on Broadway. Specific, not generic. Weather, a neighbour, the block, the season happening right now outside our door.]

[2-3 sentences: opinionated product recommendation. Why we picked this bottle. What it tastes like in plain language. Who made it. No hedging.]

[Casual throwaway food pairing. One sentence. Not precious.]

[1 sentence: the timely reason to act. The anchor day, the upcoming weekend, the game, the festival, the dinner guests arriving Saturday.]

Find it here at the shop!
The Broadway Beer Wine & Spirits Family.

#kitsilano #vancity #yvrwine #[producer or region tag] #westbroadway

Template 2: Instagram Reel (30 to 45 seconds)

Shot list of 4 to 6 clips, voiceover or on-screen caption. Opening hook in the first 1.5 seconds (most important). Trending audio or original voiceover. End on the product clearly in frame with the store interior visible.

HOOK (0 to 2 sec): Chris on camera or close-up of bottle, one sentence that frames the whole Reel. Example: "If you like an Okanagan Pinot, try this instead."

BODY (2 to 25 sec): 3 to 5 quick cuts. Bottle in hand, shelf context, pour, tasting expression, price sticker if under \$40.

PAYOFF (25 to 40 sec): the one fact that makes this bottle worth knowing. Producer story, vintage note, region. Keep it conversational.

CLOSE (40 to 45 sec): "On the shelf at Broadway Beer Wine and Spirits. Walk it in, we'll hold one for you."

CAPTION: Use Template 1 format abbreviated.

Template 3: Carousel post (4 to 6 slides)

Slide 1 is the cover hook. Slides 2 to 5 are the content (three to four products typically). Slide 6 is the call to action.

Slide 1 (cover): Big bold text. "Three Malbecs under \$30 you'll actually want to keep drinking." Use Canva template locked in brand folder.

Slides 2 to 4: One bottle per slide. Photo, producer name, one-line opinion, price, shelf location.

Slide 5 (optional): Pairing or context slide. "What we'd pour these with" in casual tone.

Slide 6 (CTA): "Come in, we'll pour you a sniff. The Broadway Beer Wine and Spirits Family."

CAPTION: Same Template 1 structure.

Template 4: Email (three-part, locked)

Mailchimp subject line, 120-character preview text, body copy.

SUBJECT: [max 45 characters, specific, no clickbait. Example: "What we're sipping for Malbec World Day"]

PREVIEW: [120 characters max, complements subject, does not repeat it. Example: "Three bottles from Mendoza under \$35, and the one we'd pick for a Tuesday night."]

BODY:

[Opening paragraph: 2 to 3 sentences. Where we are in the year, what's happening in the shop or on the block right now. First person plural.

Warm but not saccharine.]

[Feature section: 2 to 4 products. Each gets 2 to 3 sentences. Bottle, producer, opinion, price. Link each to Bottlecapps or in-store note.]

[Upcoming section: what's next. The anchor moment this email is setting up, or the one two weeks out. One short paragraph.]

[Close: "Stop in this week. We'd love to pour you something. The Broadway Beer Wine and Spirits Family."]

Template 5: Facebook (cross-post adapted)

Same content as Instagram post but swap in a Facebook Event link if relevant, remove Instagram-specific hashtags, and add a soft ask for a review or share. No bespoke Facebook production.

Template 6: Stories (daily, ephemeral)

Five content types rotating: staff pick of the day, new arrival shelfie, shop moment (pet, regular, neighbourhood), poll or question sticker (engagement), and upcoming event countdown. Templates pre-built in Canva for each type.

Rules that govern all templates

No em dashes, ever. No negatives in product copy (say what it is, not what it isn't). Food pairings are casual and throwaway in tone, never prescriptive. All product facts verified before publishing (producer, region, vintage, ABV, price). Vancouver-specific references always preferred over generic seasonal. Premium positioning: we never compete on BCL price. We compete on selection, taste, and the feeling of walking in.

Part 5: KPIs and measurement

Metrics exist to answer one question: is marketing moving revenue toward \$3 million?

Vanity metrics (follower counts, raw impressions) are tracked but never reported to ownership alone. Every metric is paired with a downstream outcome.

Weekly dashboard (Cowork generates every Friday)

Metric	Source	Target	Why it matters
Instagram reach	IG Insights	3,000+/week	Top-of-funnel

			discovery
Instagram engagement rate	IG Insights	3%+ (vs 0.48% industry)	Audience quality
Reel plays (top 3)	IG Insights	1,000+ each	Growth lever health
Email open rate	Mailchimp	35%+	List engagement
Email click rate	Mailchimp	2.5%+	Content relevance
New email subscribers	Mailchimp	15+/week	Audience growth
Squarespace sessions	GA4	Trend week over week	Owned-channel pull
DoorDash order count	DoorDash merchant	Trend week over week	Delivery channel health
Uber Eats order count	Uber Eats merchant	Trend week over week	Delivery channel health
In-store foot traffic (POS transaction count)	Barnet	Trend vs same week last year	Ultimate outcome

Monthly scorecard (Chris presents to David)

The monthly view adds revenue attribution and campaign ROI.

Metric	Source	Target
Total revenue vs prior year	Barnet POS	Trajectory toward \$3M annualised
Revenue attributable to campaigns	Barnet UTM or promo codes	20%+ of monthly revenue by month 6
Email-driven revenue	Mailchimp + POS reconciliation	Track growth
Instagram follower count	IG	50 to 100/month net growth

Email list size	Mailchimp	50 to 75/month net growth
Loyalty program signups (when launched, Phase 3)	Bottlecapps or POS	Track from launch
Campaign-level performance: each Tier 1 anchor	Composite	Reach, engagement, revenue in the week of
Review volume (Google, Facebook)	Manual count	5+ new reviews/month

Quarterly deep-read

Once a quarter, Chris writes a three-page review. What worked, what flopped, what the data says about where to invest in the next quarter. This is the document that feeds the annual calendar refresh. It also serves as the artifact of strategic thinking that separates “content posted” from “marketing done.”

Attribution mechanics

UTM tag every link in email and bio. Use unique promo codes for specific campaigns (e.g. “MALBEC26” for Malbec World Day) to tie revenue back to marketing touches in Barnet. Geographic tagging on Instagram (always tag Kitsilano and the store address). Ask customers at point of sale “how did you hear about us” and log into a simple Barnet field; even imperfect, it’s directional.

Part 6: 90-day phased rollout

Trying to launch everything in week one is the failure mode. The phased build below sequences construction so each phase is usable the day it ships.

Phase 1, days 1 to 30: foundation and reliable baseline

The goal of month one is to stabilise a sustainable publishing rhythm and get the POS-to-content pipeline stood up. Nothing fancy. Things that must exist before anything else can work.

Week 1: **Calendar and templates locked.** Finalise this document’s Part 1 calendar into a shared markdown file. Lock templates into a `/templates/` folder. Brand voice file (`brand-voice.md`) written and saved. BC LCRB compliance checklist built.

Week 2: **Barnet export cadence established.** Set up the weekly POS export (CSV of current inventory, 12-month sales history by SKU). Ensure Chris can pull this with one click.

Save to `/inventory/` . Do one manual dry run of the data flow: given this week's calendar, pick five candidate SKUs, check sales history, draft one Instagram post manually following the template.

Week 3: **Cowork set up.** Subscribe to Claude Max 5x. Create the `/BroadwayBWS/` project folder. Install the Anthropic Marketing plugin, Canva connector, and Google Drive connector. Write the first Skill file: `weekly-content-brief.md` that defines the Monday run. Test with a fake week of inputs.

Week 4: **First real Cowork run.** Monday automated run generates the week of content. Chris reviews, edits, publishes manually via Later or direct to Instagram. Capture what went well and what the drafts got wrong. Adjust the brand-voice file accordingly.

Deliverables at end of Phase 1: calendar live, templates live, Barnet-to-Cowork pipeline working, one week of content shipped via the new system, baseline metrics captured in week-four KPI dashboard.

Phase 2, days 31 to 60: cadence, Reels, and email automation

The goal of month two is to hit the recommended cadence and level up the quality of the highest-leverage formats.

Week 5: **Reels discipline.** Chris commits to two Reels per week for the full month. Shoot days are Tuesday and Wednesday. Edit in CapCut, caption from the Cowork draft. Post Thursday and Friday.

Week 6: **Mailchimp flows built.** Welcome series (3 emails), birthday, post-purchase thank-you, 90-day winback. These are set-and-forget and start generating flow-driven revenue immediately. Klaviyo data says flows produce 30x the revenue per recipient vs one-off campaigns; this is the highest-ROI build in the entire 90 days.

Week 7: **Facebook Events and Group engagement.** Create Facebook Events for every Tier 1 anchor for the next three months. Chris starts spending 20 minutes twice a week in two or three Vancouver neighbourhood Groups, answering questions and building presence (not spamming).

Week 8: **KPI dashboard automated.** Cowork scheduled task writes the Friday report pulling from IG Insights, Mailchimp, GA4, and POS. Chris and David review the first automated report.

Deliverables at end of Phase 2: full cadence hit for 4 consecutive weeks, email automation flows live, Facebook Events active, KPI dashboard running, baseline metrics trending.

Phase 3, days 61 to 90: anchors, segmentation, loyalty groundwork

The goal of month three is to execute the first two Tier 1 anchor campaigns end-to-end and set up infrastructure for the rest of the year. Month three is also when the first real quarter-review happens.

Week 9: **First anchor campaign execution.** Whichever Tier 1 moment falls here (likely a May anchor like Mother's Day or World Cocktail Day). Full multi-channel build: email series, two Reels, one carousel, Stories countdown, in-store display, inventory coordinated, Bottlecapps landing page.

Week 10: **Email segmentation live.** Create "engaged subscribers" segment (opened 3+ in last 60 days) and "wine club" segment (self-identified via a one-question survey). Monthly segmented send begins.

Week 11: **Loyalty program scoped.** Research Bottlecapps and Barnet integration options for a basic loyalty program (points per purchase, birthday reward, tier threshold). This may extend into Phase 4; the deliverable here is a written spec, not a launched program.

Week 12: **Quarter review.** Chris writes the first quarterly deep-read. What did the three months show? Where is revenue trending? What anchor worked, what didn't, what's the plan for the next 90 days. David reads this. This document becomes the template for every subsequent quarter.

Deliverables at end of Phase 3: one full anchor campaign executed end-to-end, segmentation active, loyalty spec written, quarterly review document completed, operational rhythm fully established.

Beyond day 90: extensions and ongoing

Phase 4 (days 91 to 180) builds the loyalty program, migrates the interim Squarespace site into deeper Bottlecapps integration, and begins in-store event programming (wine tastings, producer visits, Burns Night in-store event). Phase 5 (days 181 to 365) pushes into paid amplification on Meta for anchor moments, explores local partnerships (Bard on the Beach, nearby restaurants), and prepares the full 2027 calendar refresh. The quarterly review rhythm becomes the steering mechanism.

Part 7: Scope of marketing as a function (ownership-facing summary)

This section exists so that when David asks "what does marketing actually do here," there is a single page that answers it. It is not an argument for anything. It is a description.

Marketing at Broadway Beer Wine & Spirits covers six ongoing functions.

Calendar and planning: maintaining the 12-month anchor calendar, monthly priority review, quarterly deep-read, annual refresh. Roughly 2 to 3 hours per week averaged across the year, concentrated in month-end and quarter-end.

Content production: 9 pieces of core content per week (2 Reels, 1 to 2 carousels, 1 static, 5 to 7 Stories, 1 email every other week, cross-posts to Facebook and X). Photography and videography in-store. Copywriting against locked templates. Canva design. Roughly 8 to 10 hours per week.

Distribution and community: scheduling into Later or Buffer, Mailchimp management, Facebook Events and local Group engagement, DM and comment response, review replies on Google and Facebook. Roughly 2 to 3 hours per week.

Measurement and optimisation: weekly KPI pull, monthly scorecard, quarterly review. Attribution maintenance, UTM hygiene, promo code management. Roughly 1 to 2 hours per week.

Compliance and brand integrity: BC LCRB rule-checking every anchor post, trademark protection, brand voice enforcement, ongoing template refinement. Roughly 30 minutes per week.

System operations: Cowork tuning, Barnet export cadence, inventory data hygiene, Mailchimp flow monitoring, tool management. Roughly 1 hour per week.

Total sustained weekly load: approximately 15 hours at the recommended cadence, scaling up during Tier 1 anchor weeks and the December peak.

Specialised projects (outside ongoing weekly work): loyalty program launch, Bottlecapps deeper integration, paid amplification build, in-store event programming, partnership development, annual calendar refresh, website migration, new channel exploration.

That is the shape of the function. It is real work with real infrastructure behind it. This document is the infrastructure.

Conclusion: why this system holds together

The strategic bet underneath this entire playbook is that Kitsilano premium-positioned retail wins on timing, taste, and neighbourhood voice, not discounting. Every decision in the document flows from that bet. The calendar tiers anchors so the store shows up unignorably when it matters and quiet otherwise. The cadence is tuned so Chris can sustain it for a year without collapsing. Cowork takes the mechanical 60 percent of weekly work (data pull, draft generation, scheduled reporting) so the human 40 percent

(photography, judgement, relationships, voice) can get the attention that actually differentiates.

The \$3 million revenue target is not reached by posting more. It is reached by being the store that Kitsilano thinks of first on Greek Day, on the Canada vs Qatar match, on the Thursday Beaujolais Nouveau drops, on the Friday before Thanksgiving, on Mother's Day morning. The system above exists to ensure that the store is in that first-thought position on every one of those days, with the right bottles pulled forward and the right words already written.

The riskiest year of execution is the first one, because the calendar anchors are new and the Cowork workflows have to be tuned. The 90-day phased rollout is deliberately conservative for that reason. By day 90 the system runs itself, and the remaining 275 days of the year are about compounding improvements, not rebuilding the machine.

One last note on uncertainty: several 2026 anchors are still undated (Canucks 2026-27 schedule, Fall Okanagan Wine Festival, Dine Out 2027, the City's one-night fireworks replacement, Vancouver Craft Beer Week). Chris's monthly review on the third Monday should check these and update the calendar. The calendar is a living document; this playbook is its first issued version, not its final one.
